

SATC Bursary Student Robert Ambunda:

"The prestigious SATC bursary has had a significant and lasting impact on my life. Having been awarded the SATC bursary for 3 consecutive years from 2019, the financial support for my research activities and access to world-class expertise through the SATC over the years has enabled me to complete a Ph.D. in Transportation Engineering from one of the best universities in Africa, in minimum time. I'm certainly looking forward to more exciting collaborations with the SATC in addressing relevant and emerging transport related issues in the region and globally, particularly the inequalities in access to sustainable and integrated transport systems, which have had direct impacted the development of our communities and region, due to a lack of access to social and economic opportunities. Thank you to the SATC for empowering me to contribute to the advancement of transportation and society as a whole!!"
